Outbound Charges/Codes

This screenshot displays the 'Inbound Demographic' and 'Inbound Scheduling' sections of the ProVation MD interface. It includes fields for Patient Name, Procedure Date, Date of Birth, Room, and Room Number. Below this, there are sections for 'Perfusion and Wall Motion Scores' and 'Wall Motion Scores'. A large, detailed diagram of the coronary arteries is shown, with various segments highlighted in red and green, representing different levels of stenosis or blockage.

This screenshot shows the 'Outbound Results' section of the ProVation MD interface. It includes patient demographics, a 'Findings' section with a note about stenosis, and 'Wall Motion Scores' with a circular diagram showing the results for different segments. Below this, there are 'Extra Cardiac Observations' and a 'Coding' section with CPT and ICD codes. The CPT codes listed are 93.09, 93.33, 93.34, 93.35, 93.36, 93.37, 93.38, 93.39, 93.40, 93.41, 93.42, 93.43, 93.44, 93.45, 93.46, 93.47, 93.48, 93.49, 93.50, 93.51, 93.52, 93.53, 93.54, 93.55, 93.56, Cardiology

- Creates a single, complete and easily retrieved electronic note for each procedure
- Comprehensive medical content built by ProVation's in-house physician team
- Instantly and automatically prepares Patient Letters, Referring MD Letters, CC: Letters, Post-Cath Orders and Patient Instructions
- Supports both physician and technician/sonographer workflow and documentation
- Automatically pulls hemodynamic data, vitals and clinical information, nursing information, medications and devices from hemodynamic systems without duplication of effort or data entry. Outbound interface allows for submission of data to ACC-NCDR database.
- DocuDiagrams™ feature allows physicians to create color-coded diagrams that actually generate and populate codes and text within the note
- Based on physician entries, CPT-4 and ICD-9 codes and CCI edits are automatically generated
