Mapped to more than 100 CPT-4 and more than 475 ICD-9 Codes

Pain Management

- Instantly and automatically prepares Patient Letters, Referring MD Letters, CC: Letters, Post-Op Orders and Patient Instructions
- "Preferences" feature allows surgeons to save menus of selections for commonly performed procedures for faster documentation
- Interfaces with fluoroscopes, X-ray and other image capture equipment for instant inclusion of image in note
- Based on physician entries, CPT-4 and ICD-9 codes and CCI edits are automatically generated
- Creates a single, complete and easily retrieved electronic note for each procedure
- Comprehensive medical content built by ProVation's in-house physician team
