

# ■ ProVation<sup>®</sup> MD

Leading the way in procedure documentation and coding

Our documentation system is ready for:

- ☑ Benchmarking
- ☑ Quality Indicators
- ☑ Pay for Performance

## Is yours?

ProVation MD software for procedure documentation allows gastroenterologists and the facilities in which they practice to capture, track and submit GI quality indicators and relevant PQRI measures. Our software allows for structured data capture, then pairs it with robust reporting automatically, and without disruption to the usual documentation workflow. The result? Our clients are prepared for Pay for Performance, quality initiatives and other data reporting requirements.

## MEETS YOUR QUALITY REPORTING NEEDS

- **Increases** productivity by providing actionable, reportable data on physician and facility quality of care
- **Increases** revenue through compliant coding
- **Produces** complete procedure notes with all critical data elements, including scope withdrawal time, adenoma detection rates and cecal intubation rates
- **Provides** a structured data form, while allowing for customization

## INCLUDES

- Deep medical content that automatically captures key data elements without physician workflow disruption
- Robust reporting and analysis features, including data reports and procedure data export capabilities
- Easy-to-use interface for capturing exam details, patient profile, diagnostic images, findings, recommendations, patient instructions and other key procedural data
