

■ ProVation[®] MD Cardiology

Leading the way in procedure documentation and coding

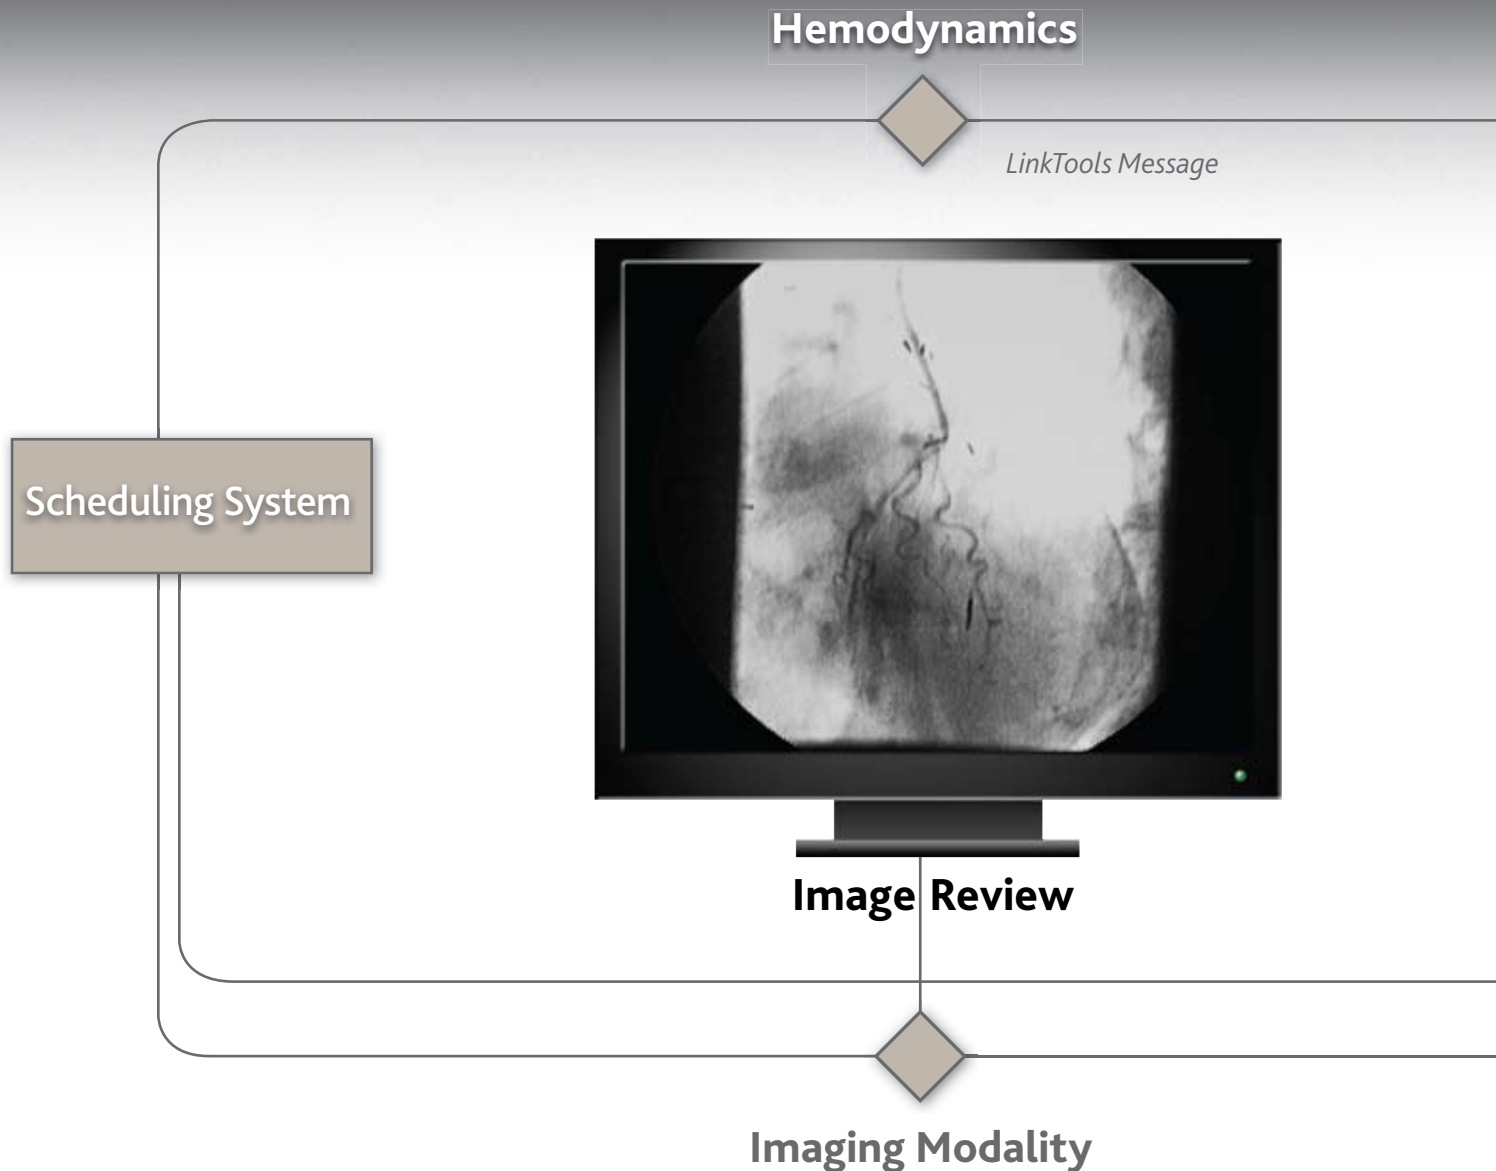

*Easy-to-use **ProVation[®] MD Cardiology** eliminates dictation and transcription*

ProVation[®] MD Cardiology software is a documentation and coding software solution that leads physicians through their procedure documentation quickly, prompting them with all the necessary detail and then automatically generating reimbursement codes.

- **Increases revenue** – Accurate procedure documentation ensures compliant coding and proper reimbursement; supports revenue recovery
- **Reduces costs** – Eliminates transcription and dictation costs
- **Interfaces with your existing systems** – Imports data from your existing hemodynamic and scheduling systems, exports data to your existing EMR and billing systems
- **Delivers physician satisfaction** – Designed by 30+ physicians to ensure intuitive navigation and ease of use, ProVation[®] software has clinician utilization rates of 95% at more than 600 hospitals and surgery centers across the country

If you use a hemodynamic system to gather your Cath Lab data
— **but physicians are still dictating** — there's a gap
in your documentation and reimbursement process.

Scheduling – ProVation® MD automatically imports data from your scheduling system

Hemodynamic System – Information from your hemodynamic system pulled into ProVation® MD for physicians to review

ProVation® MD Documentation – After reviewing images, physicians create color-coded DocuDiagrams to document the procedure, with codes and text automatically generated within the note

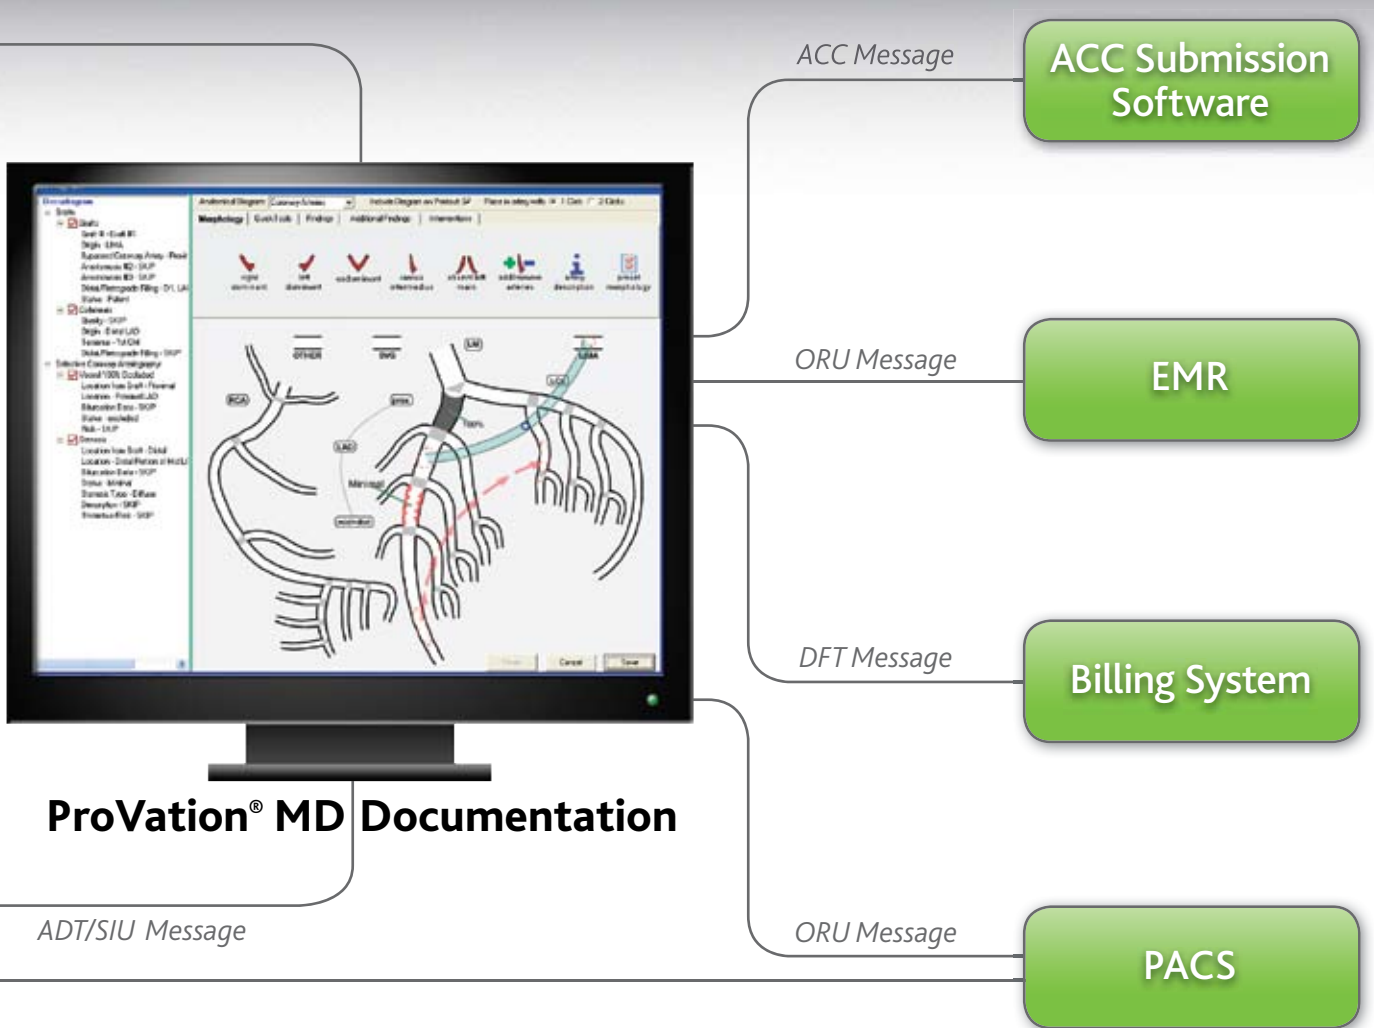

ACC Submission Software – Relevant ACC information is sent to ACC submission software

EMR – Procedure reports are sent to and become part of the EMR

Billing System – CPT and ICD-9 codes are sent to your billing system

PACS – All images can be sent to your PACS system for storage

ProVation[®] MD works with your hemodynamic system to fill the documentation gap

Fill the gap in your physician documentation with ProVation[®] MD

HEMODYNAMIC SYSTEMS PROVIDE:

- Vitals and clinical information
- Nursing data
- Administrative data
- Medications
- Devices

PROVATION[®] MD PROVIDES:

- Elimination of dictation/transcription costs and delays
- Streamlined workflow
- Faster billing and reimbursement
- Easy integration of hemodynamic data and HL7 interfaces for seamless data sharing between systems and more complete physician notes

**Visit us at ProVationMedical.com or call 888.952.6673
to arrange a product demo and workflow analysis.**

■ ProVation[®] MD Cardiology

Product Features

- Creates a single, complete and easily retrieved electronic note for each procedure and instantly prepares patient letters, referring MD letters, CC letters, post-cath orders and patient instructions
- DocuDiagrams feature allows physicians to create color coded diagrams that automatically generate and populate codes and text within the note
- Intelligent coding engine knows when additional CPTs are relevant within a complex coding environment. Automatically adds CPT anatomical site modifiers to ensure full payment
- Deep medical content utilizes ACC terminology. Eliminates the need for hospitals to build or maintain their own content or revert to dictation
- Navigation features and automatic flags guide users to more complete and compliant documentation to support coding
- HL7 ORU interfaces to hospital HIT systems
- CPT, ICD-9 codes and CCI edits are automatically generated based on physician entries
- Allows for easy compliance with HIPAA, Joint Commission, AAAHE
