

# ProVation® MD

Eliminate Transcription, Minimize Risk, Satisfy Clinicians

ProVation® MD software replaces dictation and transcription, allowing physicians to efficiently document procedures at the point of care. Built specifically for hospitals and ambulatory surgery centers, our software solutions produce complete, coding-ready and image-enhanced documentation that results in greater efficiency, increased profitability and clinician satisfaction.

- Quickly leads clinicians through the procedure documentation process with intuitive navigation
- Creates complete documentation, including e-signature, within minutes of a medical procedure
- Provides tracking and analysis capabilities that support pay for performance, quality indicators and other reporting initiatives
- Generates reports, letters, orders, requests and patient instructions automatically
- Allows for easy reporting compliance with AAAHC, HIPPA, Joint Commission and other regulations

## PROVIDES PROCEDURE DOCUMENTATION AND CODING SOLUTIONS FOR MEDICAL SPECIALTIES INCLUDING:

- Cardiology
- Ear, Nose, Throat (ENT)
- Gastroenterology
- General Surgery
- Gynecology
- Ophthalmology
- Orthopedics
- Pain Management
- Plastic Surgery
- Pulmonology
- Urology

ICD and CPT codes generated based on physician documentation.

***“ProVation® MD simplifies documentation for clinicians at the point of care and eliminates the hassles of dictation and transcription.”***

*—Jeff Broz, Operations Director,  
Imaging Applications at  
Alegent Health*

## **CLINICIAN SATISFACTION**

Thousands of physicians use ProVation software each day, thanks to its intuitive Anticipatory Interface, a series of smart menus that quickly lead physicians to create accurate, compliant documentation. Intuitive enough for even the simplest cases, yet with a breadth of medical content that meets the most complex case needs, ProVation MD is the perfect fit for medical facilities, from ASCs and community hospitals to large academic institutions.

## **PROVATION® WEBVIEW**

Enjoy immediate access to patient charts from your office, home, or on-the-go. ProVation® WebView, a companion to ProVation MD, provides secure, remote portal access to any procedure report documented in ProVation MD. ProVation WebView eliminates the need to fax charts to emergency rooms and physician offices in the event of late complications or to return to the procedure site to pick up a patient chart.

ProVation WebView is a convenient and secure standalone application that meets all HIPAA and facility security requirements.

## **INTEGRATION WITH UPTODATE®**

UpToDate subscribers can now access the premier clinical decision support resource directly from ProVation MD.

## **ELECTRONIC GIQUIC SUBMISSION**

ProVation MD quickly leads you through GIQuIC-required data fields, allowing you to capture data, query cases, and electronically submit to GIQuIC.

## **CODING ACCURACY**

Based on the physician's documentation, ProVation MD automatically generates appropriate ICD and CPT codes, along with CCI edits where appropriate. This streamlines the job of coders, allowing them to simply review and approve codes within ProVation MD. Our professional coding team maps medical content to coding, and quarterly updates ensure you always have access to the most recent codes. This can minimize compliance risk and allow for recovery of revenue that would otherwise be lost due to insufficient documentation.

## ICD-10

With the ICD-10 transition date set for October 1, 2013, ProVation Medical has already begun work for a timely and smooth ICD-10 transition. ProVation is on track to deliver the ICD-10 code set by the end of 2012, giving you months to test and prepare for the transition date. ProVation MD will function in a dual-coding environment before, during and after the transition — for as long as you need.

## DATA REPORTING AND COMPLIANCE

ProVation MD includes over 100 standard data reports and the ability to create custom reports — users can report on every click within the physician's note.

With ProVation MD, you can be sure your documentation is complete and accurate, minimizing your compliance risk. ProVation MD allows you to create reports or access records at the click of a

button, streamlining preparation in the event of a RAC audit or request from the Joint Commission, CMS, AAAHC or other regulatory bodies.

### **Reporting Capabilities Include:**

- Fellows Performance Reports
- GIQuIC Electronic Submission
- Quality Reporting
- AAAHC, Joint Commission, and CMS reporting

## WHAT OUR CLIENTS HAVE TO SAY:

*"Our physicians love that it simplifies their workflow, our staff spends less time on administrative work, and our cost savings have been extensive. We're extremely satisfied with the ProVation® solution."*

— Cindy Hall, RN, BSN; Administrator,  
Jacksonville Center for Endoscopy

*"It's an easy, effective tool that makes the staff happy, and it has paid for itself in efficiencies and streamlined workflow."*

— Joel R. Montbriand, MD, FACP,  
Gastroenterology of the Rockies

*"The value of ProVation® comes in speeding the completion and availability of electronic patient records, which will now be accessible to other caregivers and referring physicians immediately after the procedure."*

— Marcus Bost, CIO,  
Adena Health System

## AWARD WINNING CUSTOMER SUPPORT

- ProVation Medical was named #1 in the Clinical Procedure Documentation Market Segment of the 2005-2010 “Top 20 Best in KLAS Awards” reports.
- Our proven implementation method and experienced project managers ensure successful adoption of ProVation MD.
