

Provation® Apex

Multispecialty Intelligent Procedure Documentation Platform

Provation Apex is a revolutionary, cloud-based, software as a service (SaaS) platform designed to deliver the insights needed to manage your financial and clinical outcomes through the guided capture of relevant procedure data. In a class by itself, Provation Apex combines the structured data, EHR interoperability and guided navigation that you've come to expect from Provation, with the latest technological advances, including:

- Intuitive and efficient specialty-specific workflows
- Auto-generated coding
- Real-Time, Continuous Impressions
- Machine-learned favorites
- Cross-enterprise integration for centralized data access
- Cloud-based technology
- Available on any internet-enabled device – for easy access at home or on-the-go

Designed with deep medical content and intuitive workflows, Provation Apex is a comprehensive solution for procedure documentation across multiple specialties, enabling quick and easy access to discrete data and summary data across the organization.

Provation Apex Specialties

- GI Endoscopy
- Orthopedics
- Pain Management

Other Specialties Planned

- Pulmonology
- Otolaryngology
- Urology
- Cardiology

A Solution for All

Provation Apex was designed by industry-leading physicians and clinical software experts with all key stakeholders in mind.

Clinicians

- One-click procedure notes (where applicable)
- One-click e-signing
- Tailored, physician-specific machine-learned favorites and personalized configurations
- Browser-based for easy access at home or on-the-go
- Contextual, relevant and efficient workflow (includes native image capture, click-and-drag image management, auto-generated coding and mobile workflows)
- Immediate, high quality, clinically appropriate, accurate and complete communication among providers
- Custom data reports
- Ease-of-use via clean, streamlined user interface

IT

- SaaS architecture, subscription licensing
- Utilize existing end-user devices
- Migration of Provation® MD 5.0 data
- No servers to purchase or maintain
- No updates to run – never fall behind on Provation software updates
- No downtime for backups

C-Suite

- Improved coding and reimbursement with real-time note audit
- Structured data capture while supporting physician-generated narrative for the medical record
- Immediate, high quality, clinically appropriate, accurate and complete communication among providers
- Insights into quality, ROI and benchmarking
- Actionable analytics
- Improved clinician satisfaction
- Integration with EHRs, devices and imaging
