

Top Four Ways Provation[®] MD Can Improve ACCURACY & QUALITY OF CARE

“ We definitely have more accurate documentation than before, there’s no question about it. On the billing and coding side, we’ve seen an increase in revenue from capturing procedures that were not properly captured before.”

— Andrew Weiss, Endo Center at Voorhees Administrator

1

Deep Medical Content

Allows physicians to completely and accurately document procedure notes, even for the most complex GI procedures.

2

Anticipatory Interface[™]

Navigational prompts guide physicians through procedure notes, promoting the quick and consistent capture of procedure details and images at the point of care.

3

Logical Workflow

Designed to follow the physician’s natural workflow, creating efficiencies in procedure note creation and approvals.

4

Automated Ancillary Patient Reports

Automatically creates customized patient instructions, primary care letters and reports matching the captured procedure notes, immediately available at the point of care.

Provation[®] MD can:

- ✓ Improve Care Coordination
- ✓ Drive Quality Patient Outcomes
- ✓ Improve Patient Medical Records
- ✓ Drive Accurate Reimbursement and Reporting
- ✓ Automate Ancillary Patient Documentation
