Top Four Ways Provation® MD Can Improve
PRODUCTIVITY & EFFICIENCY

1
Logical Workflow

Optimizes time post-procedure and allows more time for patient care by streamlining the administrative processes of documentation.
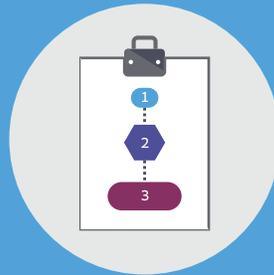

2
Anticipatory Interface™

Navigational prompts guide physician to capture such complete and accurate procedure notes that it limits the time needed to complete documentation.

3
Automated Accurate Coding

Comprehensive, accurate coding is automatically added to the procedure notes as they are created, dramatically decreasing opportunities for errors.

4
Integrate with Existing IT

Streamlines the sharing of patient and procedure information and images to maximize efficiency and close the documentation gap.

> "Provation MD has improved our workflow and procedure turnover efficiency. It has also increased the morale of the physicians working in our lab greatly, decreasing frustrations that we have had with our older reporting issues, while improving productivity."
