

Top Four Ways Provation® MD Can Improve REPORTING & COMMUNICATION

1

Structured Reporting

Enables efficient data querying and system interoperability across technologies and automatically identifies vital quality data elements per registry reporting guidelines.

2

GIQuIC Compatibility

Allows physicians to automatically generate reports that can be easily uploaded into GIQuIC, saving hours of time and ensuring accurate submission.

3

EHR Integration

Can help improve patient medical records by successfully integrating and immediately communicating with the facilities' existing electronic health records (EHR) system.

4

Completeness of Procedure Notes

Delivers such complete and accurate procedure notes that it streamlines quality reporting, while mitigating the risk of RAC audits.

“Structured data provides ease of reporting—enabling organizations that have research and fellowship programs to use this database to provide data to use for research purposes.”

— Kenneth Chi, MD
Advocate Lutheran General Hospital

Provation® MD can:

- ✓ Drive Quality, Structured Reporting for Clinical Research
- ✓ Increase Revenue through Accurate Reimbursement
- ✓ Easily Integrate with GIQuIC
- ✓ Improve Medical Records
- ✓ Mitigate Risk of RAC Audits
