*For normal screening colonoscopies

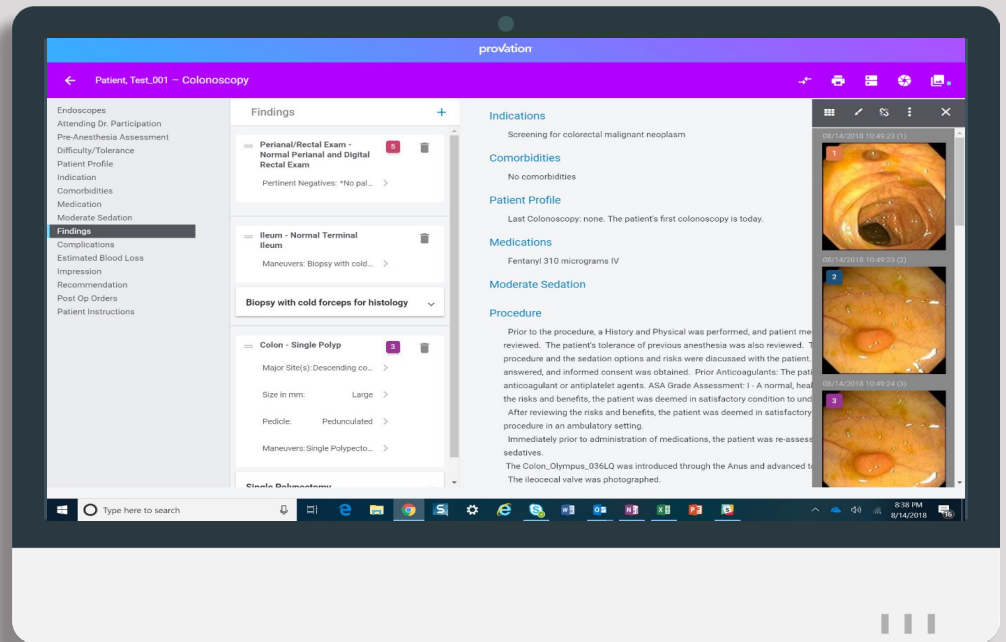

Shrink Your IT Footprint

For some hospitals, health systems and ASCs, keeping up with ProVation® MD software updates and infrastructure maintenance can be a challenge. By migrating to our cloud-based ProVation® Apex platform, you can shrink your IT footprint and reduce operational burden—eliminating the need to purchase dedicated servers and reducing support staff time needed to manage software and hardware. Instead of refreshing your servers, consider investing in Apex, the solution that's always updated and continuously increasing in value.

Personalization & Productivity in a Modern UI

With Apex, our experts have added personalization and productivity features that just weren't possible before. Best yet, all these great features presented in simple, modern user interface (UI) with familiar icons and easy-to-use functionality.
