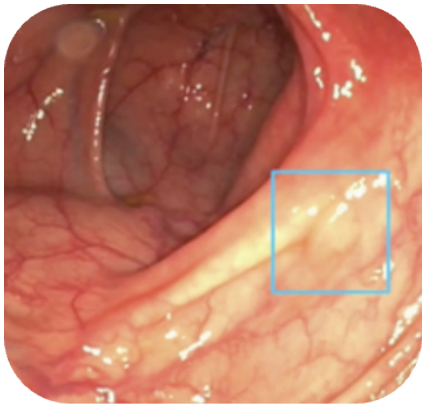
ITERATIVE HEALTH™ | provation®

SKOUT®: Real-Time AI for Polyp Detection

Artificial intelligence that augments but does not replace physician judgment

- **Detect more adenomas** enhance procedure quality[1]
- **Seamless integration** no impact on procedure time[1]
- **Differentiate** with cutting-edge AI technology



Smart detection of endoscopic tools keeps visual field clear

INCREASE ADENOMA DETECTION AND RESECTION[1]

27% relative increase in adenomas per colonoscopy (APC)[1]

Relative increase in 5-9mm polyp detection[1]

overall

proximal colon

Detects sessile serrated polyps[1]

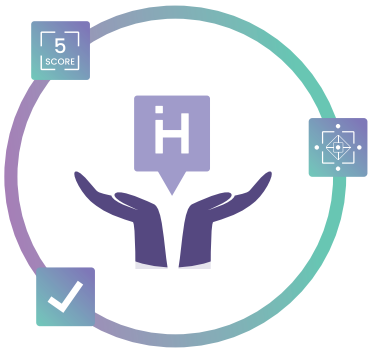
ITERATIVE HEALTH™ | provation®

SKOUT was designed with GIs in mind

- **Move easily** between SKOUT and standard video
- **Bounding box** doesn't obstruct polyp edges
- **No color or pixel degradation**
- **Supports** most common form of color blindness



LARGEST US-BASED CLINICAL STUDY OF AI FOR POLYP DETECTION[1,2]

US-based	1,359	5	22
Randomized controlled trial	US patients	Academic and community centers	High-performing endoscopists

See our Clinical Data in *Gastroenterology*
