

# SKOUT®: Real-Time AI for Polyp Detection

Artificial intelligence that augments but does not replace physician judgment

- ✓ **Detect more adenomas**  
enhance procedure quality<sup>1</sup>
- ✓ **Seamless integration**  
no impact on procedure time<sup>1</sup>
- ✓ **Differentiate**  
with cutting-edge AI technology

Smart detection of endoscopic tools keeps visual field clear

## INCREASE ADENOMA DETECTION AND RESECTION<sup>1</sup>

27% relative increase  
in adenomas per  
colonoscopy (APC)<sup>1</sup>

Relative increase in  
5–9mm polyp detection<sup>1</sup>

overall

proximal  
colon

Detects sessile  
serrated polyps<sup>1</sup>

1113-EN-V4

## SKOUT was designed with GIs in mind

- **Move easily** between SKOUT and standard video
- **Bounding box** doesn't obstruct polyp edges
- **No color or pixel degradation**
- **Supports** most common form of color blindness
- **97% sensitivity** and <2% false positive rate<sup>3</sup>

## LARGEST US-BASED CLINICAL STUDY OF AI FOR POLYP DETECTION<sup>1,2</sup>

### US-based

Randomized controlled trial

1,359

US patients

5

Academic and community centers

22

High-performing endoscopists
