

Provation® Apex

Intelligent Procedure Documentation and Patient Charting Platform

Provation® Apex is a revolutionary, cloud-based, software as a service (SaaS) platform designed to deliver the insights needed to manage your financial and clinical outcomes through the guided capture of relevant procedure data. In a class by itself, Provation Apex combines the structured data, EHR interoperability, and guided navigation that you've come to expect from Provation, with the latest technological advances, including:

- Intuitive specialty-specific workflows for physicians and nurses
- Auto-generated coding
- Real-time, continuous impressions
- Predictive entries and machine-learned favorites
- Cross-enterprise integration for centralized data access
- Cloud-based technology
- Browser-based — access at home or on-the-go

Designed with deep medical content and intuitive workflows, Provation Apex is a comprehensive solution for procedure documentation across multiple specialties, enabling quick and easy access to discrete data and summary data across the organization.

Right-Sized Price for All Sites

- Affordable subscription—only pay for what you need*
- Modest upfront software investment
- No updates or backups to maintain
- Minimal IT footprint and support needed

**Minimum purchase required*

"It's very obvious that physicians helped design this software, because it's intuitive and easy to use from our perspective. I can't say that about any of our other software."

Robert Bass, MD

Gastroenterologist at Jacksonville Beach Surgery Center

A Solution for All

Provation Apex was designed by industry-leading physicians and clinical software experts with all key stakeholders in mind.

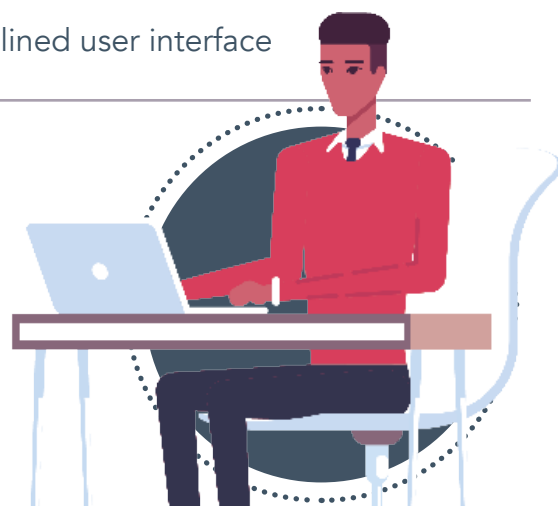

Clinicians

- One-click, e-sign procedure notes (where applicable)
- Customized templates – easy to create, modify and save on-the-fly
- Tailored, clinician-specific machine-learned favorites and personalized configurations
- Browser-based for easy access at home or on-the-go
- Contextual and efficient workflow (includes native image capture, click-and-drag image management, auto-generated coding and more)
- Clinically accurate, coder-ready procedure notes
- Custom data reports
- Ease-of-use via clean, streamlined user interface

IT

- SaaS architecture, subscription licensing
- Utilize existing end-user devices
- Migration of Provation® MD data
- No Provation Apex software updates to run
- No server backups to maintain
- No downtime for backups

C-Suite

- Improved coding and reimbursement with real-time note audit
- Structured data capture while supporting physician-generated narrative for the medical record
- Immediate, high quality, clinically appropriate, accurate, and complete communication among providers
- Insights into quality, ROI, and benchmarking
- Actionable analytics
- Improved clinician satisfaction
- Integration with EHRs, devices, and imaging
