Provation® iPro

Comprehensive. Mobile. Extraordinary.

A Comprehensive Suite of Perioperative Solutions with AIMS at its Core.

Consistently named a *Black Book Leader* and *#1 Best in KLAS*, Provation® iPro is a comprehensive cloud-based anesthesia documentation and perioperative data management software suite. Designed to support the entire perioperative workflow—from pre-op through post-op, iPro streamlines the capture, flow, and management of patient data throughout the perioperative encounter to improve documentation, OR efficiency, patient safety, and medication management.
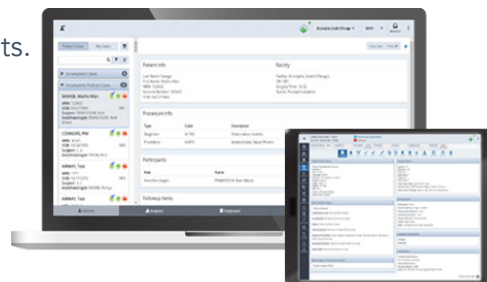

"I wish there was something I could tell the vendor to improve, but we really love the product and enjoy working with the Provation iPro team. When we call their customer support in the early hours of the morning, we get the help we need. Support is not an issue with Provation iPro."

— Chief Anesthesiologist

Provation® iPro Anesthesia Information Management System (AIMS)

Designed by practicing anesthesiologists, Provation iPro AIMS is the first-ever mobile anesthesia information management system. Cloud-based and intuitive, iPro supports fast and accurate clinical documentation, standardizes the collection of quality measures, and delivers complete, compliant, and legible anesthesia records.

- Interfaces with billing companies and all major EHRs, including MEDITECH® and Altera Digital Health®, formerly known as Allscripts.

- Wirelessly captures physiological data at consistent time intervals

- Intuitive, configurable, and easy-to-use

- Instant data capture for real-time analytics and reporting

- Collects and submits quality metrics (PQRS, MACRA/MIPS)

"I think Provation iPro is ahead of all of the large AIMS vendors. iPads with iPro access go with us wherever we go, so we don't have to pay thousands of dollars to add hardware in every anesthesia setting. Everything is streamlined, elegant, and user-friendly."

- Anesthesiologist

Provation® iPro PAT

Optimized for surgery centers and hospitals (hospitals use our PAT throughout the world), Provation iPro PAT is an anesthesia-specific preoperative evaluation solution with an efficient and intuitive user interface that guides providers through collection of information for patients scheduled for surgery.

- Facilitates telephone and/or in-person patient evaluations
- Integrates collected data into AIMS
- Streamlines H&P process
- Configurable with institutional and accepted clinical protocols

Provation® iPro Perfusion

Provation iPro Perfusion is an intraoperative solution designed to improve quality of care and patient safety by automating data collection during surgery and perfusion interaction.

- Automation saves times and improves the quality of data collected
- Helps minimize errors associated with paper charting
- Integrates with iPro AIMS and existing EHRs, including MEDITECH® and Altera Digital Health®, formerly known as Allscripts.
- Increases access to data for actionable insights
- Supports Pre and Post-procedure checklists enhancing patient safety and reducing errors.
- Collects Perfusion focused quality indicators

Provation® iPro Analytics

Add Provation iPro Analytics, a robust reporting tool, to your AIMS platform to efficiently analyze data captured during the perioperative encounter, get clinical insights and business intelligence, improve operations, and enhance patient safety.

- Real-time access to data
- Clinician and administrative dashboards and reports
- Identify and implement best practices
- Reports drillable to case or physician level

Provation® iPro PACU

Provation iPro PACU allows PACU staff to manage and document patient recovery and associated clinical data in an intuitive software platform. Previously captured assessment, patient, and case data automatically flows through to PACU staff to provide valuable patient and procedure information.

- Pathway-based structure delivers standard forms and controls
- Configurable forms and workflows to support hospital standardization efforts
- Streamlines the documentation process through charting by exception
- Field finder makes it easy to identify all field requirements (as defined by the organization) before signing off on a chart

Provation® iPro Billing

Provation iPro Billing streamlines anesthesia billing efficiencies by automating extraction of pertinent case information and incorporating coding crosswalks to ensure use of accurate charge codes and modifiers. iPro Billing saves time and reduces error rates by automatically generating electronic charge tickets.

- Quicker revenue capture
- Integrates with billing systems and external anesthesia billing companies
- Optimizes charge capture with templates and picture documentation
- Hard stops help ensure complete information capture in NORA cases

Provation® iPro ASC

Cloud-based and mobile-friendly, Provation iPro ASC is designed specifically for ambulatory practices and surgery centers to optimize patient outcomes, improve clinical efficiency, and easily create and manage complete electronic patient records.

- Integrates with existing EHRs, including MEDITECH® and Altera Digital Health® (formerly known as Allscripts), as well as billing and practice management systems
- Personalized templates ensure fast and efficient charting
- Traqboard monitors the status of patients and staff in real time
- Multi-user access on a single instance

"I would say the Provation iPro team is 100% invested in our success. We are very lucky to have them as a vendor, and we work with a very supportive team."

- Anesthesiologist

Your iPro Journey Starts Here.

With Provation iPro, you can choose the solutions that best fit the needs of your organization, clinicians, and perioperative teams.
