

TOP 5 REASONS

Provation® iPro® AIMS outperforms all others

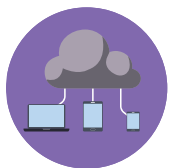

"Provation® iPro® outperforms all other anesthesia vendors in nearly every performance and customer satisfaction measure."

- KLAS™ Reports¹

Consistently named a *Black Book Leader* and #1 *Best in KLAS*, Provation iPro is a comprehensive mobile Anesthesia Information Management System (AIMS) designed to improve documentation, operating room (OR) efficiency, and patient safety. Our 24/7 support and commitment to customers has earned us top ratings for service and support, performance, and overall user satisfaction.

In addition to being a **category leader**, here are the top five reasons iPro outperforms all other anesthesia solutions.

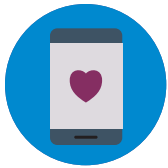

#1 Mobile

As the world's first mobile anesthesia information management system (AIMS), Provation iPro offers:

- Consistent charting across all operating room and non-operating room anesthesia (NORA) locations
- Secure access to patient health information (PHI), always at the providers' fingertips
- The ability to move freely between facilities and in and out of the OR

¹ KLAS Performance Report 2016, iProcedures has since been renamed to Provation® iPro®.

#2 User-Friendly

Designed by practicing anesthesiologists, Provation iPro is an easy-to-use, intuitive AIMS platform that:

- Guides users through the documentation process
- Ensures anesthesia records are complete, compliant, and legible
- Supports configurable rules and alerts
- Adapts to a facility's workflow to enhance the customer experience

#3 Interoperable and Flexible

Device and vendor agnostic, Provation iPro interfaces with:

- EHR systems to create seamless clinical records and billing companies to optimize charge capture
- Anesthesia machines and monitors to wirelessly stream patient physiological data
- Other systems and vendors to allow users to focus on patient care and make the most of investments already made

#4 Actionable

Provation iPro empowers healthcare leaders with real-time access to robust dashboards and reporting to:

- Enable analysis of data captured during the perioperative process
- Deliver deep clinical insights and business intelligence
- Help establish best practices, improve operations, and enhance patient safety
- Allow users to leverage valuable data and uncover actionable insights to improve overall practice performance

#5 Compliant

Provation iPro includes built-in features to help anesthesia teams:

- Comply with current regulatory measures
- Maintain practice and facility accreditation
- Update software consistently to adhere to ever-changing compliance and regulatory measures
