Provation® Apex
Patient Charting

Empower your care team with true end-to-end continuity of care

Nurses are the lifeblood of your organization and they deserve smart tools that make it easy for them to be more efficient and thorough. If your care team is completing patient documentation using paper forms or fragmented electronic templates, your site is at greater risk of staff turnover, miscommunication, missing records and duplicate documentation. Plus, your site is missing out on all the advantages of having a smart software like Provation® Apex Patient Charting throughout the patient experience, from pre-call to follow-up.

Is paper holding you back?

Your clinical staff's efficiency depends on the tools at their disposal. Set your team up for success by replacing paper nurse notes, forms and anesthesia documentation with cloud-based Provation Apex Patient Charting. Here are just some of its benefits over paper charts.

- Easy access to patient data, on-demand for your entire team
- Editable patient charts throughout the continuum of care, from pre-call to post-op
- Customizable nurse and anesthesia forms
- Freedom to document wirelessly on any internet-enabled device
- Continuously updated medication and allergy content

- Integrates with Provation® Apex Procedure Documentation
- Streamlined specimen collection and tracking
- Structured data capture to support quality reporting, benchmarking and operational insights
- Electronic logs for procedure events and interventions
- Vitals integration, eliminating manual entry

The future of patient charting is in the cloud

Your nurses, techs and anesthesiologists will love being able to document wirelessly on any internet-enabled device. And yet, that's only one of the benefits of using the cloud. Here are a few more.

- Automatic software backups and updates via the cloud
- Best in class data security certifications (ISO27001, SOC2, HIPAA)
- Lower upfront cost with affordable subscription
- Electronic consent with signature capture on any touch device
- 24/7/365 Provation support with minimal in-house IT support needed

Don't take our word for it
