7 Key Benefits of an Anesthesia Information Management System

Provation® iProcedures® is the first **mobile, cloud-based** Anesthesia Information Management System (AIMS) **designed and perfected by practicing anesthesiologists**. This **EHR-agnostic system** outperforms all other anesthesia vendors in usability and ease of use (#1 in KLAS 2017–2019).

Delivering Effective Healthcare with Efficient Solutions

Population Health Benchmarks
Enables anesthesia providers to compare population health outcomes.

Timely Surgeries
Improves on-time case starts by supporting the entire Perioperative workflow from Pre-op through PACU and beyond into ancillary area.

Efficient Communication
Helps patient data stream directly into an anesthesia clinician summary view, which helps the clinician see relevant data needed to prepare a case.

Optimized Patient Care
Enables anestheisa providers to focus more on patient care instead of recoding notes manually through capturing physiologic data from medical devices.

Decision Support
Delivers built-in decision support tools that ensure the reliability of evidenced-based medical guidelines with accurate documentation.

Legible, Accurate, Standard Documentation
Reduces risk of errors from non-standard documentation and illegible notes.

Adherence to Clinical Protocol
Provides templates and checklists to help ensure that the team follows protocols for conditions such as malignant hypothermia or anaphylaxis.

With iProcedures, the benefits include overall **heightened levels of financial, clinical and administrative performance** as well as the ability to **electronically capture data** and **create actionable information** that **optimizes patient care, drives efficiencies, and improves team communication.**
