

## Robust and actionable anesthesia quality reporting and analytics

### Demonstrate your value with Quality Concierge®

One of the main differentiators of Quality Concierge® are the robust, actionable reports and analytics that leverage real-time data for hospital contracting, insurance provider negotiations, quality improvement initiatives, national benchmarking, and a lot more.

Our customers tell us they like to be able to analyze their data consistently throughout the year, to give them an edge. And Quality Concierge does this by offering a variety of reports and analytics for providers and administrators to track QA compliance, identify and recover lost revenue, track case delays and cancellations, and monitor provider care, patient outcomes, and patient experience.

### Customer favorites

- ✓ **Provider by Month QA Completion Report**  
Allows users to track completion of provider entered quality data, and reconciles cases reported and billed to identify lost revenue.
- ✓ **Outcome Measure Summary Report**  
Drills down into case counts, conditions, measure responses, and specific patient outcomes by provider and/or by location.
- ✓ **Patient Experience Survey Summary Report**  
Summarizes patient experience feedback and satisfaction and allows users to benchmark performance.
- ✓ **Quality Performance Report**  
Tracks emergency cases, case cancellations and delays, and adverse outcomes.

Quality Concierge® can help you demonstrate value and performance, identify areas for improvement, and support contract negotiations.
