

Elevate Your Endoscopy Software

Why Provation Customers are Migrating to the Cloud

As the market leader in endoscopy documentation software, Provation has always been at the forefront of GI innovation. While our server-based technology has served us well, it's reached its limits. That's why we recommend that all of our Provation® MD customers consider migrating to Provation® Apex, our cloud-based, intelligent procedure documentation platform. Provation Apex not only encompasses all the features our customers love about Provation MD, but its cutting-edge technology unlocks even greater opportunities for innovation, efficiency, and scalability. Discover the advantages of the cloud in our side-by-side comparison.

Feature	 Provation® Apex Advantages	 Provation® MD Challenges
Technology Platform	Cloud-based technology established in 2018; best-in-class operational resilience powered by Microsoft® Azure	Server-based technology established in 1994; database managed and maintained by customer
IT Requirements	Automated, bi-weekly software updates encompass the latest content and coding updates managed and deployed by Provation	Annual updates require IT resources and scheduled downtime; dedicated servers required
Accessibility	Flexible access from any internet-enabled device	Users tied to specified PC workstations
Security	Best-in-class security certifications, including HIPAA, AICPA SOC2, ISO 27001, and ISO 27701	Customer is responsible for server security
Deep Medical Content	Medical content is always up-to-date with the latest standards	Medical content updated annually
Image Management	Click-and-drag to associate images during documentation	Associate images after documentation
Reimbursement Coding (CPT, HCPCS, ICD-10)	Auto-generated based on procedure note selections for maximum reimbursement	Customer manually generates
Intuitive Workflows	Predictive entries automatically surface sites' most-used selections; physicians select personal favorites	One-size fits all Anticipatory Interface™
Reporting	Microsoft Power BI™ is embedded for robust reporting and filtering capabilities	Canned and customizable reports can be time-consuming and difficult to pull
Data Visualization	Pre-built and customizable dashboards designed to improve productivity, quality, efficiency, and utilization	Limited built-in data visualization capabilities
Customer Success	Dedicated Customer Success Director proactively invested in your success	No dedicated Customer Success Director
Ongoing Learning	Embedded Learning Center for on-demand training	Challenging new user on-boarding and adoption

Investing in the Future: What the Cloud Unlocks

Not only is ProVation Apex delivering real value today, our vision is to harness artificial intelligence (AI) and data to drive further efficiencies and enhance the quality of GI care. We aim to automate documentation and take the burden off of clinicians. Additionally, our goal is to leverage the enormous amount of structured data captured in ProVation Apex to power exciting new innovations, such as enterprise reporting, industry benchmarking, predictive analytics, quality improvement opportunities, and more.

Your Data Comes With You

As a ProVation MD customer, we know you've spent years capturing data in the system. The good news? With hundreds of sites already migrated, we have a proven process to ensure your data migrates smoothly into ProVation Apex.

You can then leverage advanced analytics and reporting tools to gain deeper insights into your data. This transition not only preserves the integrity of your historical data but also enhances its accessibility and usability. With ProVation Apex, you can identify trends, optimize workflows, and make data-driven decisions that improve patient outcomes and operational efficiency.
