

Provation® Apex Benchmarking Dashboards

Empowering Precision, Enhancing Care

Provation® Apex Benchmarking Dashboards are a set of dynamic dashboards that provide near real-time, data-driven insights and industry comparisons that help track key performance indicators (KPIs) across multiple departments or sites.

With these dashboards, administrators and healthcare providers can monitor and compare clinical and operational metrics with other organizations in the Provation Apex Community, driving enhanced decision-making, operational efficiency and further compliance with industry standards.

KEY BENEFITS

- ✓ Gain insights into performance gaps, best practices, and improvement opportunities
- ✓ Leverage one of the largest GI industry data sets to make data-driven decisions and boost efficiency
- ✓ Save time with pre-built, intuitive visualizations—no data export required
- ✓ Take immediate action with near real-time data

How does it work?

Provation Apex Benchmarking encompasses dashboards grouped into two categories: Operational and Clinical.

Each dashboard provides an enterprise view for users to see how their organization stacks up against the rest of the Provation community and industry standards.

The dashboards include flexible filters that allow users to select the procedure volume of the comparison set so they can be confident they are benchmarking against relevant data.

Operational Dashboards

Adenoma Detection Rate (ADR)

Prep Quality

Cecum Reached/
Withdrawal Times

Aborted Exams

Clinical Dashboards

Procedure Time

Clip Usage

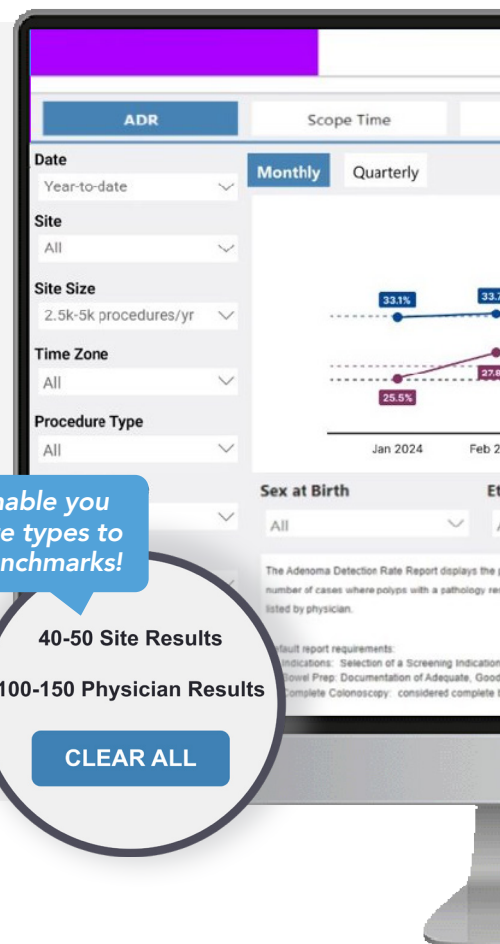

Cancellations

Flexible filters enable you to select which site types to include in your benchmarks!

40-50 Site Results
100-150 Physician Results

CLEAR ALL
