

Provation® Fellows Module

A Smarter Way to Evaluate GI Fellows

Challenge Meets Innovation

Academic hospitals and health systems often struggle with delayed, inconsistent, and manual documentation of fellow performance—leading to missed insights, subjective evaluations, and limited opportunities for growth.

The new Provation® Fellows Module, fully integrated with Provation Apex, solves these challenges by enabling real-time, data-driven tracking and evaluation. This powerful tool streamlines procedural performance capture, automates assessments, and delivers actionable insights—transforming how GI fellows are evaluated, coached and advanced.

Key Benefits

Embedded in Provation Apex

Assess skills in the same platform where procedures are documented—no dual systems.

Real-Time Feedback

Reduce memory reliance and deliver timely, objective evaluations.

Standardized Assessment Configuration

Evaluations are created, delivered, and analyzed in alignment with ASGE guidelines, ensuring consistency with established educational objectives, accreditation requirements, and clinical training workflows.

Streamlined Reporting

Minimize manual tracking with automated, actionable data.

COMING SOON Visual Dashboards

Monitor performance trends in skills, scope times, volume, and more.

Available at no additional cost for Provation Apex customers!

The Results?

- ☒ Better-trained fellows
- ☒ Lower administrative burden on program leaders
- ☒ Stronger compliance with accreditation standards
