Provation® Mira
Documentation Assist

Say Goodbye to Tedious Data Entry!

Provation® Mira Documentation Assist streamlines your procedure documentation like never before. Powered by AI, this hands-free technology allows clinicians to seamlessly document findings and maneuvers for colonoscopy and upper GI endoscopy procedures by speaking naturally. Speech is automatically converted into structured text, eliminating the need for redundant, manual data entry.

Speak. Document. Simplify.

Reduced Cognitive Burden
Supports clinician satisfaction by eliminating post-procedure recall and transcription, allowing physicians to focus more fully on patient care during and after procedures.

Time Savings
Streamlined note review with voice-populated note elements, creating space for physicians to get ahead in their day.

Improved efficiency of RCM
Real-time notes lead to faster coding, reducing time to submission, enhancing Provation's leading revenue integrity back end coding engine.

Your Voice — Your Documentation

- ☑ More Time for Patients
- ☑ Streamlined Workflows
- ☑ Fewer Clicks, Greater Efficiency
- ☑ Hands-Free Flexibility
- ☑ Real-Time Accuracy
- ☑ Reduce Cognitive Burden

Provation® Mira
Documentation Assist

AI-Powered Precision You Can Trust

Beyond simple dictation or ambient listening technology, Provation Mira Documentation Assist is an enterprisegrade, AI-powered voice capability that leverages advanced algorithms to capture and convert speech to structured text with unmatched accuracy.

The only tool of its kind built on 30+ years of GI expertise, it is designed specifically for the unique needs of GI providers and ensures documentation is both reliable and accurate.
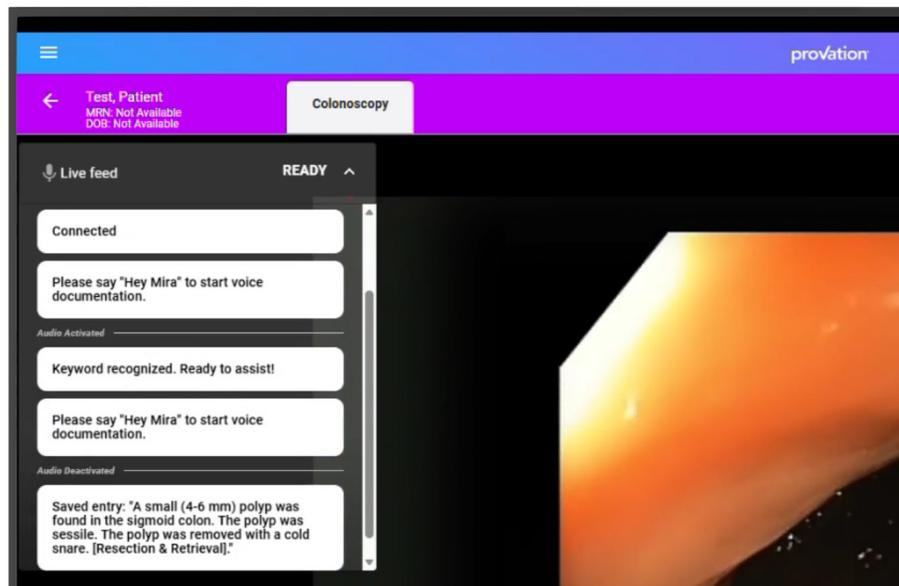

How it Works

Provation Mira Documentation Assist is easy to use.

Located in the Provation Apex Image Capture module, the physician simply utilizes a "wake word" to turn on the feedback microphone. As they note the findings and maneuvers performed, their speech is captured on screen and then flows seamlessly to structured data in the procedure note.
