The Analytics Bottleneck:
Moving from Data to Action

The Problem: Rich Data, Limited Access to Insights

Healthcare organizations collect vast amounts of clinical, operational, and financial data, but accessing meaningful insights remains surprisingly difficult.

The challenge isn't lack of information. It's the widening gap between data availability and actionable intelligence.

Critical Challenges with Traditional Analytics

Dependency Delays	• Users submit requests and wait while IT prioritizes against competing demands • Back-and-forth clarifications slow the process • Reports need modifications after delivery
Growing Backlogs	• Report requests accumulate faster than teams can fulfill them • Simple questions that should take minutes instead take weeks • Decision-makers either wait for information or proceed without it
Resource Mismatch	• Demand for data-driven insights has expanded across all organizational levels • Technical expertise to extract insights hasn't kept pace • IT teams overwhelmed by analytics requests
Missed Opportunities	• Delayed decisions lead to avoidable financial risks • Patient safety issues go undetected longer than necessary • Users struggle to identify what requires immediate action

The Solution: Provation Mira iPro Insights

Turn data into strategic intelligence and action instantly, without IT dependencies.

Provation® Mira iPro Insights combines conversational AI with the uniquely integrated clinical, operational, and financial data captured through the Provation® iPro AIMS platform to deliver powerful, role-specific insights in seconds.

Key Benefits

- ☑ **No Technical Barriers:** Ask questions in natural language and get instant answers.
- ☑ **No IT Dependencies:** Self-service analytics for all authorized users.
- ☑ **Real-Time Insights:** Move from data to action in seconds, not weeks.
- ☑ **Comprehensive Integration:** Access the full spectrum of perioperative data in one platform.

TRANSFORM YOUR PERIOPERATIVE ANALYTICS

Book a demo or speak with a Provation expert to learn how Provation Mira iPro Insights can empower better decisions across your organization.

Role-Specific Analytics Access

Clinical Leaders
Quality improvement metrics, patient safety indicators, and documentation efficiency tracking.

Operational Teams
OR efficiency monitoring, case volume analysis, physician productivity and throughput metrics.

Revenue Cycle Leaders
Reimbursement optimization insights, revenue cycle analytics, and billing extracts.
