

pro^vation®

Provation® Apex for Orthopedics

Close the gap between the OR and the claim.
Accelerate your revenue cycle.

Cloud-native operative documentation that instantly turns natural surgeon dictation into a complete, billing-ready note, so cases move straight into the revenue cycle without delay.

BUILT FOR BOTH SIDES OF THE ASC

Better for the surgeon. Better for the bottom line.

FOR SURGEONS

**Get your time back.
Finish the note in minutes.**

- **Complete a note in minutes**
Finish operative documentation in minutes instead of hours or days later.
- **Review and sign immediately**
Notes generated instantly. No transcription lag. Edit on the fly with voice.
- **Eliminate repetitive dictation**
Templates for common procedures. Say it once and move on.

FOR ADMINISTRATORS

**Stop letting documentation
choke the revenue cycle.**

- **Shorten the surgery-to-billing cycle**
Faster signoff accelerates downstream coding and billing.
- **Increase documentation efficiency**
Workflows designed for timely, structured documentation.
- **Reduce colleague time correcting note**
Fewer errors mean less downstream cleanup across clinical and billing teams.

THE PROVATION APEX PLATFORM DIFFERENCE

Built for scale. Built for security. Built for **orthopedics**.

Interoperable

- Seamless integration with scheduling systems
- Compatible with existing EMR/EHR/PM platforms
- Native DICOM interface for arthroscopic imaging

Cloud-native, any device

- No servers, no installs
- No maintenance windows
- Biweekly updates
- Accessible via any internet-enabled device, mobile or desktop

Enterprise grade

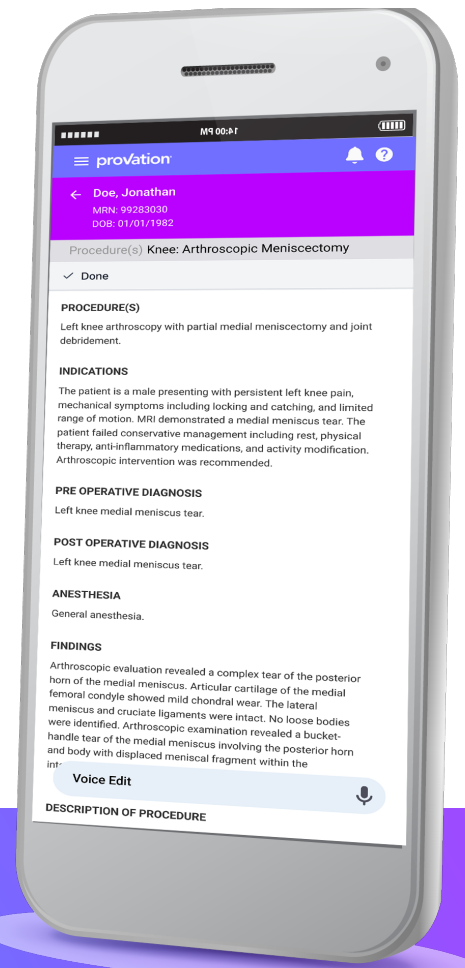

- SOC 2-certified infrastructure
- End-to-end encryption
- Role-based access controls
- SaaS subscription, no capital expenditure required

A unified documentation platform across **specialties**.

Orthopedics joins a growing family of specialties on the Provation Apex platform.

Every module shares the same cloud-native foundation, giving organizations a single, unified documentation platform across departments – with pre-built EHR integrations for Epic, Cerner, MEDITECH, and other major systems.

Cross-enterprise integration enables centralized data access and reporting, while automatic software updates ensure teams always have the latest features with minimal downtime.
