

# Provation<sup>®</sup> iPro Billing Package

Transform finalized anesthesia documentation into accurate, billing ready data, automatically

## THE PROBLEM

Anesthesia billing workflows are complex and often rely on manual interpretation, crosswalks, and data re-entry after the case is complete. This creates delays, inconsistencies, and audit risk due to:

- Missing or incorrect CPT, ASA units, modifiers, or time calculations
- Manual reconciliation between clinical documentation and billing systems
- Back and forth clarification between clinicians, coders, and billing teams

## THE SOLUTION

The Provation iPro Billing Package uses finalized clinical documentation as the single source of truth for charge creation. Purpose built for anesthesia, the solution:

- Standardizes billing logic
- Improves billing speed, accuracy, and confidence
- Reduces revenue risk and manual touchpoints

## KEY BENEFITS

### ACCURACY

Billing calculations derived directly from finalized clinical data reduce errors, denials, and audit risk.

### SPEED

Automated charge generation and delivery reduce lag between case completion and billing submission, accelerating time-to-cash.

### EFFICIENCY

Structured billing workflows and a consolidated billing interface reduce manual reconciliation and follow up work.

### AI OPTIMIZATION

AI-enabled optimization helps ensure valid CPT codes for all procedures are captured to drive confidence in billing finality.

## WHO IT'S FOR

➤ HOSPITALS & HEALTH SYSTEMS

➤ AMBULATORY SURGERY CENTERS (ASCs)

➤ ANESTHESIA GROUPS

Used by billing teams, revenue cycle leaders, and finance executives who want faster, more predictable, and auditable anesthesia billing.

LEARN MORE

## Reduce the cost and risk of traditional anesthesia billing

Discover how the Provation iPro Billing Package can help you transform finalized documentation into faster, more accurate revenue cycle results.
